Email: msnyder@accedian.com

Products/Services: Accedian Networks™ is an industry-leading provider of High Performance Service Assurance™ solutions for Carrier Ethernet and IP networks. Today, the Company is the number one provider of performance assurance solutions for Carrier Ethernet backhaul networks with an installed base of over 75,000 cell sites, and more than 90,000 platforms sold worldwide. Since its inception in 2004, Accedian's award-winning platform has been successfully deployed by over 300 telecommunications providers, cable MSOs and mobile operators offering carrier-grade, packet-based applications in mobile backhaul, Ethernet business, wholesale access, and carrier exchange services. Accedian was founded with a vision to help accelerate Carrier Ethernet deployments world-wide using a combination of product innovation, education and support. In 2006 Accedian launched its High Performance Service Assurance platform enabling service providers and operators to leverage the best of Carrier Ethernet, without sacrificing on network service quality or performance, while at the same time reducing overall capital and operational expenditures. A key differentiator of this platform has been, and continues to be, Accedian's patented Fast-PAA's™ engine—the industry's only Fast Performance Assurance Agent silicon processor that enables the measurement of Key Performance Indicators of network health without adding delay to service traffic as it transits the demarcation device. Accedian's family of wire-speed service demarcation and performance monitoring equipment consistently outperforms switches or routers. Powered by the Company's High Performance Service Assurance™ platform, the Accedian EtherNID®, MetroNID® and MetroNODE 10GE™ family of demarcation and OAM aggregation devices enable end-to-end service provisioning and assurance with carrier-grade performance. They feature the industry's most comprehensive remote test and performance monitoring functionality, as well as advanced service creation and traffic management capabilities that enable premium services backed by assured service level agreements (SLAs). With the Accedian's unique hardware-based FastPAA's™ processor at the core of every product, they deliver the most precise in-service measurements available, without adding delay or delay variation to pass-through traffic. Since its inception, Accedian has received numerous awards and accolades including most recently #1 fastest growing technology company on the 2011 Deloitte Technology Fast 50™ in Canada, and #2 on the Fast 500 across all North America. Company President was also named Ernst & Young's 2011 Quebec Entrepreneur of the Year. Other awards include Frost & Sullivan's 2010 North American Customer Value Enhancement of the Year Award in Service Assurance for Carrier Ethernet Mobile Backhaul Networks, Frost & Sullivan's Best Practices Award, Broadband Gear Report's Diamond Award, Canada's Top 10 Award for two consecutive years, Supercomm 's 10 Hottest Technologies, as well as a spot on the Branham 300. Accedian Networks is a privately held company, backed by Tier-1 US and Canadian growth equity and venture capital firms including Summit Partners, Skypoint Capital, BDR Venture Capital & RHO Capital Partners. The Company is headquartered in Montreal, Canada, with regional offices in the U.S., Europe, Latin America, Middle East and Asia.

ADB Utility Contractors

21 Progress Parkway Union, MO 63084
Telephone: 636-583-8448

Contact(s): JC Evans
Telephone: 214-914-7447
Email: jcevans@adb-us.com

Products/Services: ADB is a customer-oriented contractor that provides the BEST quality and value. The well-being, safety and career growth of every team member are the benchmarks of ADB's success. ADB provides many services within the utilities construction industry. For over a decade our expertise has been employed in planning, installation and maintenance of both aerial and underground infrastructure work. ADB utilizes a variety of construction methods, including directional drilling or boring, plowing and trenching. Our highly skilled, diversified workforce allows us the flexibility to choose the most cost-effective and least disruptive placement method. ADB shares a common goal with our telecom, broadband and utility customers of constantly striving to provide a higher level of satisfaction for every project we complete and every client we encounter. This mission is being accomplished through the proactive communication methods utilized by the team at ADB, which limits the period of inconvenience through effective planning and quality productivity. Our outstanding reputation in the industry and our dedication to meeting and exceeding our customers' needs has fueled our growth and allowed us to build trusting, long-standing relationships with our customers. The company record of repeat business speaks for itself. Over 95% of ADB's current business is a result of renewed contracts awarded by completely satisfied customers from previously completed projects. Top management's dedication to providing immediate responsiveness in resolving customer issues and concerns has earned ADB the reputation of being the 'Go To' contractor with every customer that has experienced ADB's style of Customer Care.

Associated Tele-Networking, Inc.

14100 W. 35th Place – Ste. 102 Aurora, CO 80011
Website: <http://www.atni.us>

Contact (s): Ryan Carpenter
Telephone: 303-865-5702 Mobile: 720-296-0427 Fax: 303-366-0691
Email: ryan.carpenter@atni.us

Products/Services: ATNI is based in Denver, Colorado and provides Installation and De-Installation services to Tier 1 – Tier 4 Telecommunication Providers, Data Centers and Major Enterprise operations. Our largest clients are Qwest, Verizon, T-Mobile, XO Communications and Level 3. We install telecommunication equipment for Cisco, Fujitsu, Nortel and Metaswitch. Our Clients (large and small) benefit from the fact that we offset the costs of de-installation by liquidating the value of Legacy equipment and we offer a “Turnkey Solution” to their installation de-installation and Disposition needs.

We handle the resulting Legacy equipment in four ways:

- 1) Resale in the “Grey Marketplace”
- 2) De-manufacture to extract base metals, precious metals, plastics and resalable components.
- 3) Fully inventoried, storage and stock level maintenance
- 4) Discrete purchase of used equipment on behalf of our Clients.
- 5) Redistribution to other locations within client’s footprint.
- 6) Total destruction of “sensitive equipment” as required.

Our teams can operate anywhere within USA, Canada and include Technicians to Level IV (Power). We also handle Hazardous materials (Batteries, CRT Monitors etc) to EPA guidelines and resell used Gensets for our clients. All work and processes are compliant with GR1275.
